

Integral Rod Hanger Assembly

ROD HANGER

When well servicing is delayed for reasons such as budgets or cost cutting, it is common practice to “hang” the rods. Precision Machining and Mfg. offers an integral system rather than fitting multiple pieces together. The hanger is also manufactured from solid material instead of welded hangers.

Features:

- Compact and simple solution which eliminates multiple parts and lowers cost
- Cross over hangers are available so that you can use more than one size of rod
- One piece hanger eliminates the chances of weld failure

BOX SIZE	API PIN SIZE	HOLDS HANGERS	SLOT SIZE	BULL PLUG	HANGER OD
3 1/2" EUE <small>*Drift Std. Tubing</small>	3 1/2" EUE	3/4", 7/8" 1" X-OVER 3/4"x 7/8" X-OVER 7/8"x 1" <small>*Regular coupling OD</small>	3/4"	3 1/2" EUE	3 1/4"
